## Why IdaPro® and IdaPlus®?

IdaPro® and IdaPlus® Milk Proteins are manufactured from farm fresh, Grade A fluid milk using a proprietary cold filtration process to concentrate the milk protein while significantly reducing the lactose content.

IdaPro® and IdaPlus® Milk Proteins contain native whey proteins and micellar casein in the same unaltered ratio as naturally occurring in milk along with important easy-to-absorb milk minerals such as calcium, phosphorous, magnesium, and zinc that are complexed to milk proteins. These fast and slow digesting proteins are ideal for muscle protein synthesis, long term amino acid release, and lasting satiety in sport nutrition, adult nutrition and weight management applications.
